Vitripiazza® is high-quality, vitrified porcelain paving with solutions for external patios and driveways, internal tiles and wall cladding. Vitripiazza has something to suit all budgets as it offers 60 different colours across 20 beautiful ranges, with a wide selection of accessories to create the perfect finishing touches.

WHY CHOOSE VITRIPIAZZA?

Strong & Hard Wearing

Resistant to salt and acid.
Higher resistance to algae and mould.
Low water absorption.
Frost resistant.

Natural Beauty

Each porcelain flagstone offers a varied colour blend, with numerous pattern connotations to reflect natural landscaping materials.

Slip Resistance

All external Vitripiazza products are classified as low slip potential.

Higher Stain Resistance

The low porosity of Vitripiazza means that spills and general soiling are less likely to soak into the flag, making them easier to clean and highly resistant to staining.

Vitrified Porcelain

All our ranges are vitrified porcelain. Quality is assured from Talasey with specifications to suit all styles and budgets. Our helpful key below helps you understand the different specifications.

Bring The Outside In

In addition to 18mm - 20mm thick flagstones, designed for external use, some of the Vitripiazza ranges have a matching 10mm thick tile, for internal use, to enable a continuity of floor design from home to garden. Some ranges offer a 9.5mm thick tile that is suitable for both internal and external use.

Understanding our Vitripiazza products

Rectified: The edges are machine cut after firing, giving a consistent work size with tight tolerances, allowing for minimal joint widths and crisp lines.
Please check packaging for consistent batch and work size information prior to opening.

Non-Rectified: The flags are fired and then batched into work sizes. Individual batches are supplied as one work size. Minimum 6mm joints recommended.
Please check packaging for consistent batch and work size information prior to opening and allow for variable joint widths.

Matching Internal Options: Available to order, please allow 3-4 weeks lead time.

Available to Order: Please allow 3-4 weeks lead time.

Full-Bodied Construction: All of our Italian ranges are full bodied and suitable for driveway applications. The materials in the body of the flag are carefully colour matched to the flag surface print.

Colour-Bodied Construction: For those where both style and budget are a consideration retaining the assurance of excellent technical properties.

To help you further as you make your choice, or before you start with installation, we recommend you read our Vitripiazza Before You Start Guide on page 44.

VITRIPIAZZA BEFORE YOU START GUIDE

For further great pre-purchase tips and post-installation care and advice, we strongly recommend you continue your research by reading our informative reference documents, **Planning & Installing Vitripiazza** and our **Guide to Understanding Vitripiazza**.

To download both documents please visit the Knowledge Hub on www.vitripiazza.co.uk.

PRODUCT MEASUREMENTS

All product sizes, weights and coverages stated throughout this portfolio are nominal and subject to manufacturing tolerances. All Vitripiazza sizes are subject to either Rectified or Non-Rectified work sizes.

Rectified product ranges are the same work size every time you purchase.

Non-Rectified work sizes can vary from batch to batch.

It's **IMPORTANT**, before unpacking, you check work sizes are compatible if you have received more than one pallet.

BATCHING

Vitripiazza Paving is produced in batches, each with an individual shade reference, we strongly recommend that sufficient product for each project is purchased together and from the same production batch, as there may be slight colour variations between different batches.

It's **IMPORTANT**, before unpacking, you check the shade references are compatible if you have received more than one pallet.

We recommend you keep a note of your batch number for any potential future orders, in case a batch match is possible.

Scan the QR code to view our Guide to Understanding Batching.

SURFACE FINISHES

Internal & External use products may vary in surface finish. The 10mm internal use tiles are slightly smoother than their external equivalent flagstones. Both internal and external Vitripiazza products have the required anti-slip rating for their applications.

COLOUR BANDING

Even when shades are batch matched, it is best practice that the installer mixes paving tiles from multiple packs when installing any Vitripiazza product to avoid any potential colour banding.

INSTALLATION

Please see our Pavetuf range of specialist products for more information

Page 92

For our understanding and installing guides visit the Knowledge Hub on www.vitripiazza.co.uk.

We recommend that Vitripiazza is always installed using Pavetuf Priming Slurry. For joints, Pavetuf Jointing Grout is ideal and is designed specifically for use with porcelain products. Pavetuf Jointing Mortar is suitable whatever your project, including driveways. Pavetuf Jointing Compound can also be used for many applications.

For full details on our range of Pavetuf products please visit www.pavetuf.co.uk.

For further product information and product images please visit www.vitripiazza.co.uk.

LOOKING AFTER YOUR VITRIPIAZZA

The cleaning and maintenance of our Vitripiazza products is easy due to their high resistance to staining. Often soapy water or low pressure washing is enough to clean off general soiling and weathering. However, for more robust and specifically designed cleaning solutions, please see our Pavetuf range of specialist cleaners.

For more information on our Pavetuf range of specialist cleaners see:

Page 102
